

REMARKS

A Substitute Specification is enclosed herein to replace the original specification included with the application when originally filed. The original specification has several errors that were recently discovered during the prosecution of other co-pending applications. Also enclosed is a marked-up version of the Substitute Specification which shows the changes made in the Substitute Specification by underlining added text and striking out deleted text. No changes have been made to the claims, drawings or the abstract. The Applicants submit that no new matter has been introduced into the application by the Substitute Specification.

Respectfully submitted,

Gary R. Lomp
